

# Manuals

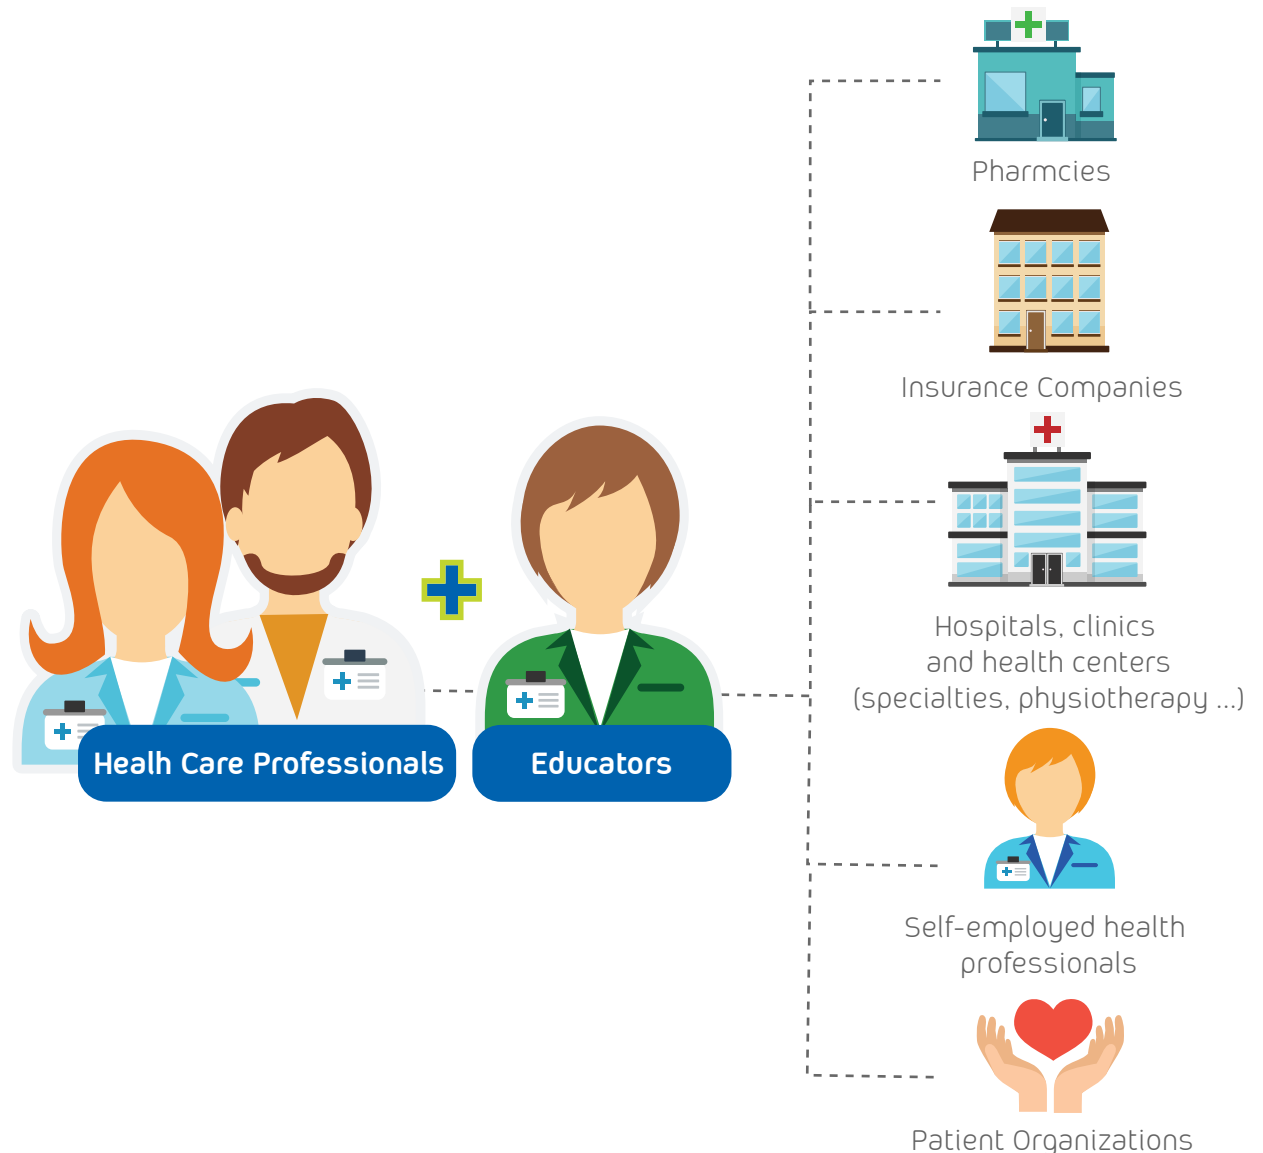

## Organizations:

Using the HappyAir platform  
& service

# How to join

**Lovexair provides access & service support to the HappyAir platform for :**

**Healthcare professionals, hospitals, clinical centers, pharmacies , researchers & patient organizations that want to offer Comprehensive Care Plans or manage research projects with their own healthcare teams, patients and their families or care-givers.**

# First Steps

1

Go to [www.happyair.org](http://www.happyair.org) for general information about the HappyAir Ecosystem, details on clinical validation and the benefits of using this service, depending on the type of entity you represent.

2

Contact us at [happyair.org/contactanos/](http://happyair.org/contactanos/) and discuss your own situation, with more information we can determine how best to develop a service model for your organization, size, number of healthcare professionals and patient community needing support based on their pathology or care needs.

3

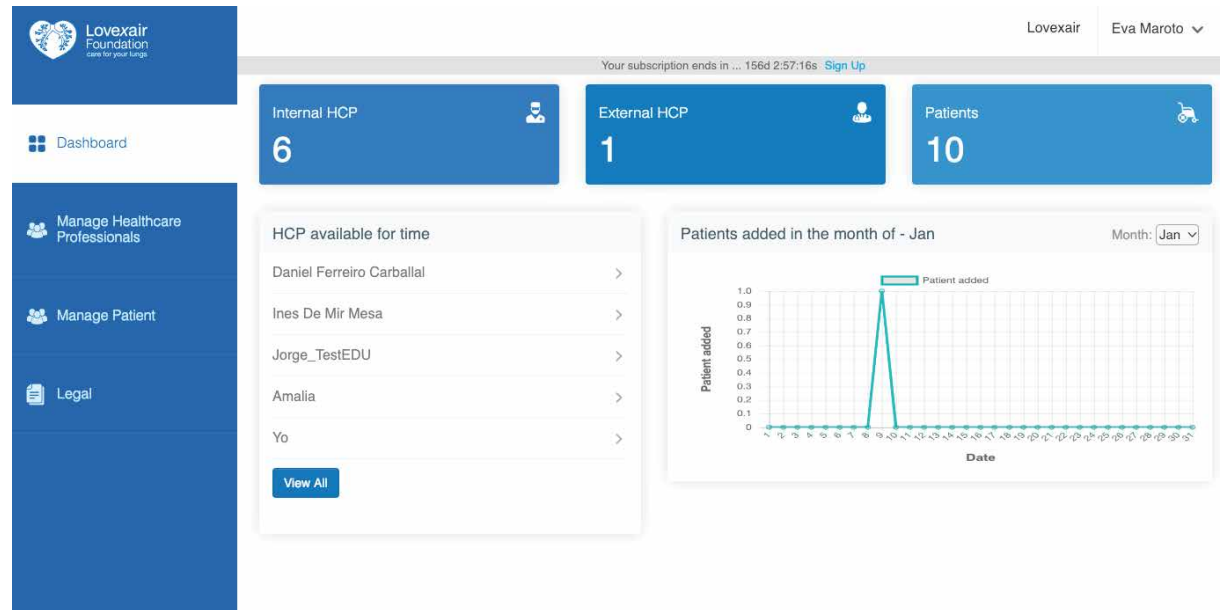

We can then draft a contract for use of service with appropriate terms and conditions. We will also provide you with online access to legal documents for your users and organization to meet compliance with GDPR/HIPAA for compliance purposes, [the contract and consentment documents](#) layout the management and procedures of this service.

4

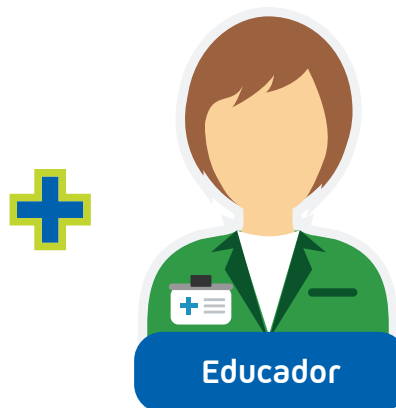

We will send you access [credentials to the platform](#), for your organization in the name of a representative of your organization, during the demonstration period .At the close of the demonstration period, these details can be amended if the service is continued under contract.

# Healthcare Professionals & Patients

**You can enroll educators, healthcare professionals, therapists and patients from your control panel.**

**If you do not have educators to monitor your patients, the Lovexair Foundation can train or provide additional people to help manage your community. Please contact us if required.**

**We will store digital copies of signed consent documents for each user and we ask that you also complete this step to meet with your own GDPR/HIPAA compliance obligations.**

**The HappyAir Platform is hosted in AWS Secure Cloud for Health & Life Sciences meeting GDPR requirements.**

# All set!

**Now you can start to coach your patients & help them develop their own personal care program.**

**If you wish to obtain more information, resolve any issues or suggest any improvements which help you work better as healthcare professionals or patients, please contact us:**
